Abstract of JP 10171742 (A)

PROBLEM TO BE SOLVED: To provide a communication controller and a storage medium capable of easily performing access to a network at the time of receiving data. **SOLUTION:** A CPU 2 executes a data receiving processing, and receives the URL data(address data) of an internet by FM multiple broadcasting through an FM multiple broadcasting receiving device 7. Then, the CPU 2 performs access through a communication controller 5 to the internet based on the received URL address, receives WWW page data corresponding to the received URN address, and displays the data on the display screen of a display device 6.
